

Stockholm 2026-01-15

We adhere to SS-EN ISO 26000:2025 and are dedicated to integrating corporate social responsibility across our entire value chain by working with employees, customers and partners who share our vision of a Europe made resilient through readiness, unity and industrial strength where freedom and safety is a shared reality for all.

Scandinavian Astor Group was founded with the mission of uniting a rising force of thinkers, innovators and producers because freedom and safety depend not just on those who fight, but those who build. By delivering advanced solutions primarily within the defense and security sectors, we embody responsibility in a changing world. Today, our focus remains on combining technical innovation with resource efficiency and ethical business practices, enabling us to contribute to national and international security without compromising our environmental objectives.

Based on our double materiality assessment, we have identified and prioritized the following core subjects in accordance with ISO 26000. We follow a systematic approach to setting targets, implementing actions, and monitoring progress, with a strong focus on organizational governance, environmental responsibility, and fair operating practices. Within Organizational Governance and Ethics, we apply zero tolerance for corruption and work actively with information security to protect sensitive data and ensure business continuity. Regarding the Environment, we work systematically through environmental management systems—with several subsidiaries already ISO 14001 certified—to ensure resource efficiency and reduced impact in our production. In terms of Labor Practices and Human Rights, we foster a safe and inclusive environment for our employees and extend these requirements to our suppliers to mitigate risks across the value chain. Finally, through Fair Operating Practices, we take responsibility for our products throughout their entire lifecycle, with a particular focus on safety and responsible communication.

This sustainability declaration reflects our ongoing commitment to continuous improvement. We uphold the seven core principles of social responsibility and disclose how we have applied the guidelines and requirements of the standard. We invite our partners, employees, and customers to join us on this journey towards a more secure and sustainable future. Together, we take responsibility, we innovate, and we create safety for future generations.

Mattias Hjorth

CEO of Scandinavian Astor Group AB (publ)
